Washington, DC 20510

Re: Indianapolis Public Transportation Corporation (IndyGo)  
FY 2010 Appropriations Project – Bus Replacements

Dear Senator Lugar:

The Indianapolis Public Transportation Corporation (IndyGo) is respectfully submitting a request for consideration for funding for FY 2010 to replace large aging buses in our fleet which serves and supports the citizens in Marion County.

You have been a leader in the movement for more efficient government, sustainability and efforts to utilize renewable and alternative fuels. IndyGo has been following your lead in all these areas specifically our efforts to reduce our dependence on foreign oil. IndyGo currently has two hybrid electric large buses in the fleet and hopes to add more as we implement our replacement bus schedule over the next few years.

Our funding request directs resources toward the replacement of an aging fleet approaching the useful life which need to be replaced to allow IndyGo to continue providing transit services to the citizens of Marion County and offer a viable transportation alternative to reduce mobile emissions and use of petroleum fuels.

Thank you for allowing us the opportunity to submit this funding request and for your continued support to IndyGo and the people of our state.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Michael A. Terry'.
